KEY CABINETS

When it comes to keys, you want to make sure they're safe. From a simple key cabinet to a more advanced issue and monitoring system, SFL can offer a solution to meet your requirements.

THE NEW HIGH SECURITY ELECTRONIC KEY SAFE 80

Manufactured to the same exacting standards as our maximum protection cash safes, the new High Security Electronic Key Safe 80 offers an effective key management solution with cost effective key tracking capabilities. Featuring 81 key hooks, the Key Safe 80 has an additional 15 closed loop hooks situated on the rear of the door and is supplied with 20pcs tamper resistant seals. This innovative system ensures up to 15 individual 'high importance' keys cannot be removed without detection but are still easily accessible in the case of an emergency. As it is important to monitor access to the key cabinet, the Key Safe 80 is fitted with a SFL EDL77 electronic lock. These locks have been used successfully by our customers for over 15 years and offer the facility for 2 user codes as well as a 4-14 digit code length and anti-tamper lockout feature. Emergency override codes are also included so that access can be granted even in the event of an out-of-hours requirement.
